PRINCIPAL INVESTIGATOR'S REPORT
OF AD-HOC SCHEME ON

Design and Development of Wind Turbines and its
Feasibility Studies in Kerala.

All India Co-ordinated ICAR Scheme on Renewable Sources
of Energy for Agriculture & Agro-based Industries

For Presentation at the Fifth Annual Workshop

To be held at

University of Agricultural Sciences,
Dharwad

February 9 - 12, 1988

DEPARTMENT OF FARM POWER, MACHINERY & ENERGY
FACULTY OF AGRICULTURAL ENGINEERING & TECHNOLOGY, KCAET,
KERALA AGRICULTURAL UNIVERSITY
TAVANUR - 679 573.

ACKNOWLEDGEMENT

Deep sense of gratitude is expressed to the Indian Council of Agricultural Research for sanctioning an Ad-hoc Scheme entitled "Design and Development of Wind Turbines and its feasibility studies in Kerala" in the Department of Farm Power, Machinery & Energy at the Kelappaji College of Agricultural Engineering and Technology, Kerala Agricultural University, Tavanur under All India Co-ordinated Scheme on Renewable Sources of Energy for Agriculture and Agro-based industries. The encouragement and co-operation received from the Vice-Chancellor and Director of Research, Kerala Agricultural University and Dean of the Faculty are gratefully acknowledged. Thanks are also due to all the scientists, teachers, technical and administrative staff who have helped in the preparation of this report.

Principal Investigator.

GENERAL INFORMATION

1. Project Title : Design and Development of Wind Turbines and its feasibility Studies in Kerala.
2. Sanction No. : 1-1/84-AE dt. 8-7-1985.
3. Date of start : 1-1-1986.
4. Report period : 1-1-1987 to 31-12-1987.
5. Time for completion of project : 3 years.
6. Department : Farm Power, Machinery and Energy.
7. Name of the institution: Kerala Agricultural University.
8. Location : Kelappaji College of Agri. Engineering & Technology, TAVANUR - 679 573.
9. Technical Personnel employed:
a) Principal Investigator: Prof. C.P. Muhammad.
b) Staff position:

Sl. No:	Name, Designation and Scale of pay	Date of joining	Total No. of months spent during report period	Date of leaving	Remarks
1.	Hamza Mollakadavath (Research Associate (Engg) Rs.1000/- consolidated.	7-4-86	6 months	23-6-87	The post was vacant from 23-6-87 to 10-12-87.
2.	P. Mathai, Res. Associate(Engg) Rs.1000/- cons.	10-12-87	1 month		Contin- nuing.
3.	M.N.Sreeranjini, Res. Associate (Agrl. Meteorology) Rs.900/- cons.	12.10.87	3 months	Contin- nuing.	The post was vacant till 12-10-87.
4.	M. Sivadasan, Technician Rs.800/- cons.	19.5.86	12 months	Contin- nuing.

		=====	=====

The Wind Turbine Research at K.A.U.

1.1 Introduction:

Although wind mills had been invented and introduced for a variety of applications like waterpumping and corn grinding centuries back, and later abandoned at the advent of cheap and abundant fossil fuels, particularly oil, they have recently been identified as one of the major sources of renewable energy on the confirmation that the end of fossil fuel resource is not far. A variety of wind turbines have been designed and developed, many of them are proved to be very successful; still research is continued all the world over. ICAR has, in this context sanctioned an Ad-hoc Scheme namely "Design & Development of Wind turbines and its feasibility studies in Kerala". The duration is 3 years and this is the second year of implementation. The work is being carried out in the Department of Farm Power, Machinery and Energy of the KAU at TAVANUR.

1.2 Objectives:

The primary objective of the project is to substitute a substantial part of the energy need for water pumping in Kerala State with wind energy. In specific, the objective is divided into:

- (a) To conduct analytical studies to work out the possibilities and potential for using wind power for agricultural use.
- (b) To conduct comparative studies of various existing wind turbine proto types.

1.3 Practical Utility:

There is a very good potential for using wind mills for water pumping in Kerala. Although an exhaustive wind data collection from ~~every~~ every nook & corner of the State is practically not

possible within this limited period, it has been possible to identify the following places on the basis of the data collected:

- | | |
|-----------------|-----------------|
| 1. Alleppey | for 12 months. |
| 2. Kozhikode | 10 - 12 months. |
| 3. Cannanore | 5 - 8 months. |
| 4. Vellanikkara | 6 months. |

In addition to these, the Dept. of Science & Technology of the State Government has identified the following places having potential for Wind Energy Utilization:

- | | |
|----------------|--------------------|
| 1. Kettamala | 4. Moolathara |
| 2. Kuttippuram | 5. Pallissery |
| 3. Keeloor | 6. Dhanuvachapuram |
| | 7. Ambalappuzha. |

1.4 Wind Data:

Wind speeds have been collected from 9 places in the State and reproduced as Appendix - I. It is evident that there are many potential parts in the State for economical exploitation of wind energy. As there are not the only places, it necessitates to collect wind data from interested farmers and others with the help of the Extension Directorate of the University for which a draft proforma is enclosed in Appendix - II. In the second phase of this project this information can be made use of for on the site evaluation of the wind mills.

2. Investigations:

The theory of wind rotors shows that those working by virtue of lift give a higher power coefficient than those working as a result of Drag; unfortunately the former have less starting torque than the latter, which is essential for pumping. It was therefore decided to try on the

following versions rotors with the aim of bringing out successful designs, blending the advantages of both.

2.1 Vertical Axis Wind Turbine with hinged straight blades:

Among the VAWT only savonius type is reported to have been used for water pumping; this is because the other types are not self starting and have low torque characteristics. The design made to do away with these draw backs is to use hinged blades as shown in Fig. 1. The blades can swing through 90° from the tangential direction to radial direction at the time of start, and later come to tangential direction during running. With this arrangement the rotor is self starting due to drag force and continue to run by lift force. Its performance evaluation and operational defects if any are yet to be studied.

2.2 Savonius rotor with deflector augmentor:

Although savonius rotors work on the principle of drag and have a power coefficient in the order of 0.2, they have been identified as an ideal contrivance for wind pumps, because of high starting torque, simple construction with a vertical shaft. With a view to improve the power coefficient, savonius rotors with a three component concentrators have been reported which increased the C_p upto 0.5 at a tip speed ratio of about 1.5. As the construction of these concentrators is very costly these are seldom used with savonius rotors. The concept of deflector augmentor has been introduced in this context and a working model is built. The preliminary observations of this version showed encouraging performance.

A full scale prototype is under fabrication. The Fig. 2 shows the details of the rotor with deflector augmentor.

2.3 A Low Cost Sail Wing Wind Pump:

The most popular wind pumps in the country use the horizontal axis multibladed wind rotors with metallic blades. This full-steel pump unit may cost about Rs.25,000/- in the actual market and is highly prohibitive for an average Indian farmer. A low cost design with sail type rotor and a set of gear trains with a single stage self priming pump is being made. The most important step to reduce the over all cost is the use of unserviceable automobile parts which is available abundantly in the country at a fairly low price. These parts are highly suitable for the low speed operations of the wind rotor. Strong & light bamboo poles are used as radial supports for the sails (Fig. 3). The design specifications for this wind pump are shown in Table - 1. The fabrication is in progress.

2.4 3 bladed, horizontal axis rotor:

A 3 bladed model with a rotor diameter of 3 metres with G.I blades of 1 M length and 10 cm camber is fabricated and installed (Fig. 4). This is expected to produce 0.1 hp at an average wind speed of 20 kmph.

It was decided in the last workshop that a wind generator would be supplied to this centre from PAU Centre, which could be coupled to this turbine. The design details of this rotor is shown in Table - 2.

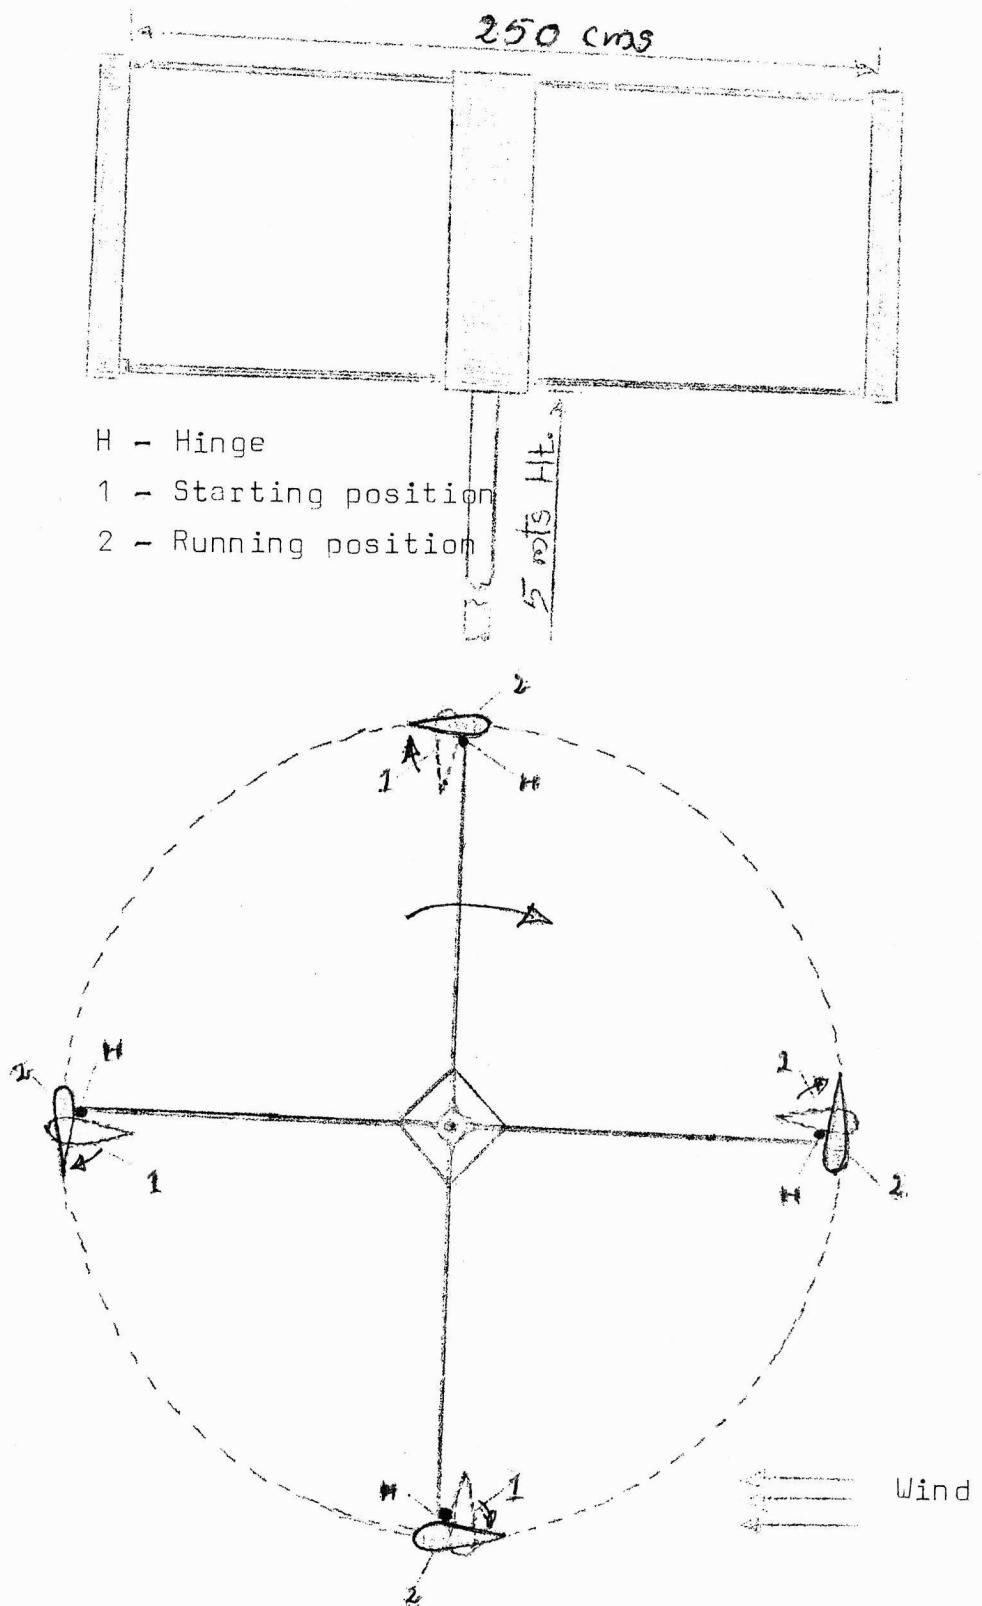

Fig.1. Vertical Axis Wind Turbine with hinged straight Blades.

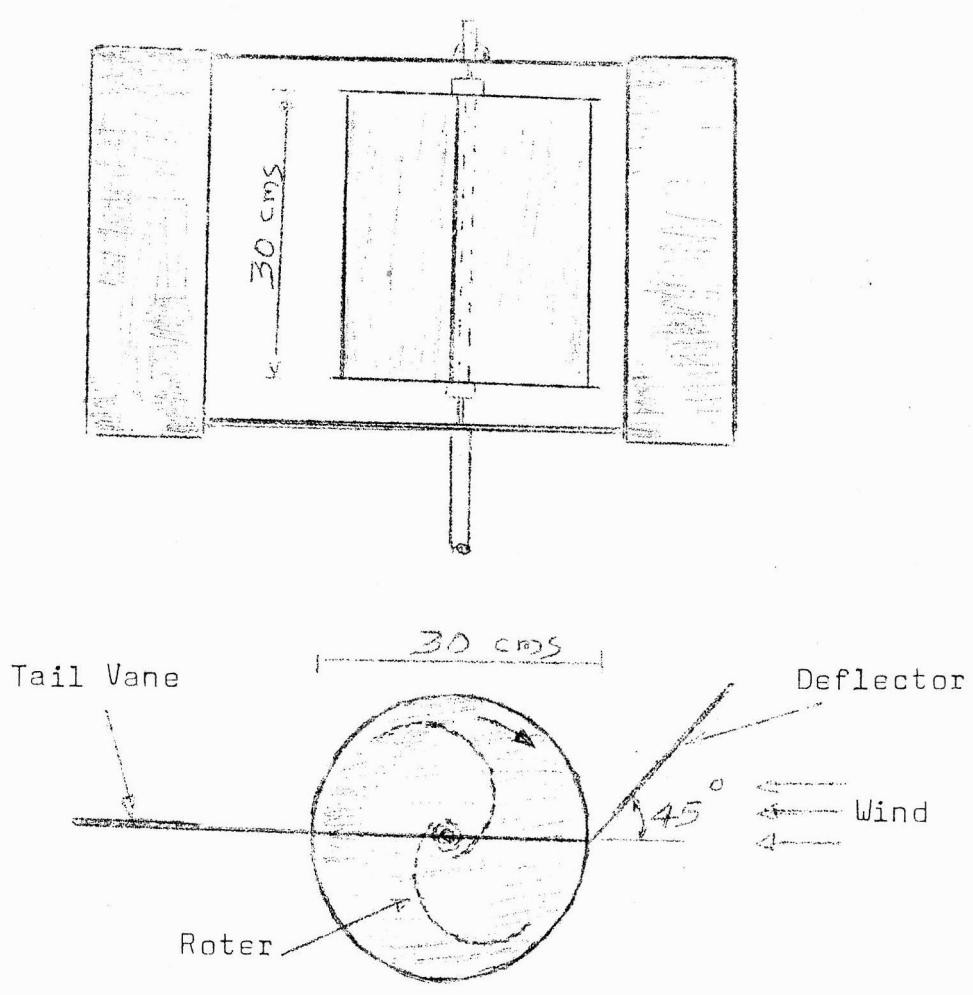

Fig.2. Savonius rotor with deflector Augmentor

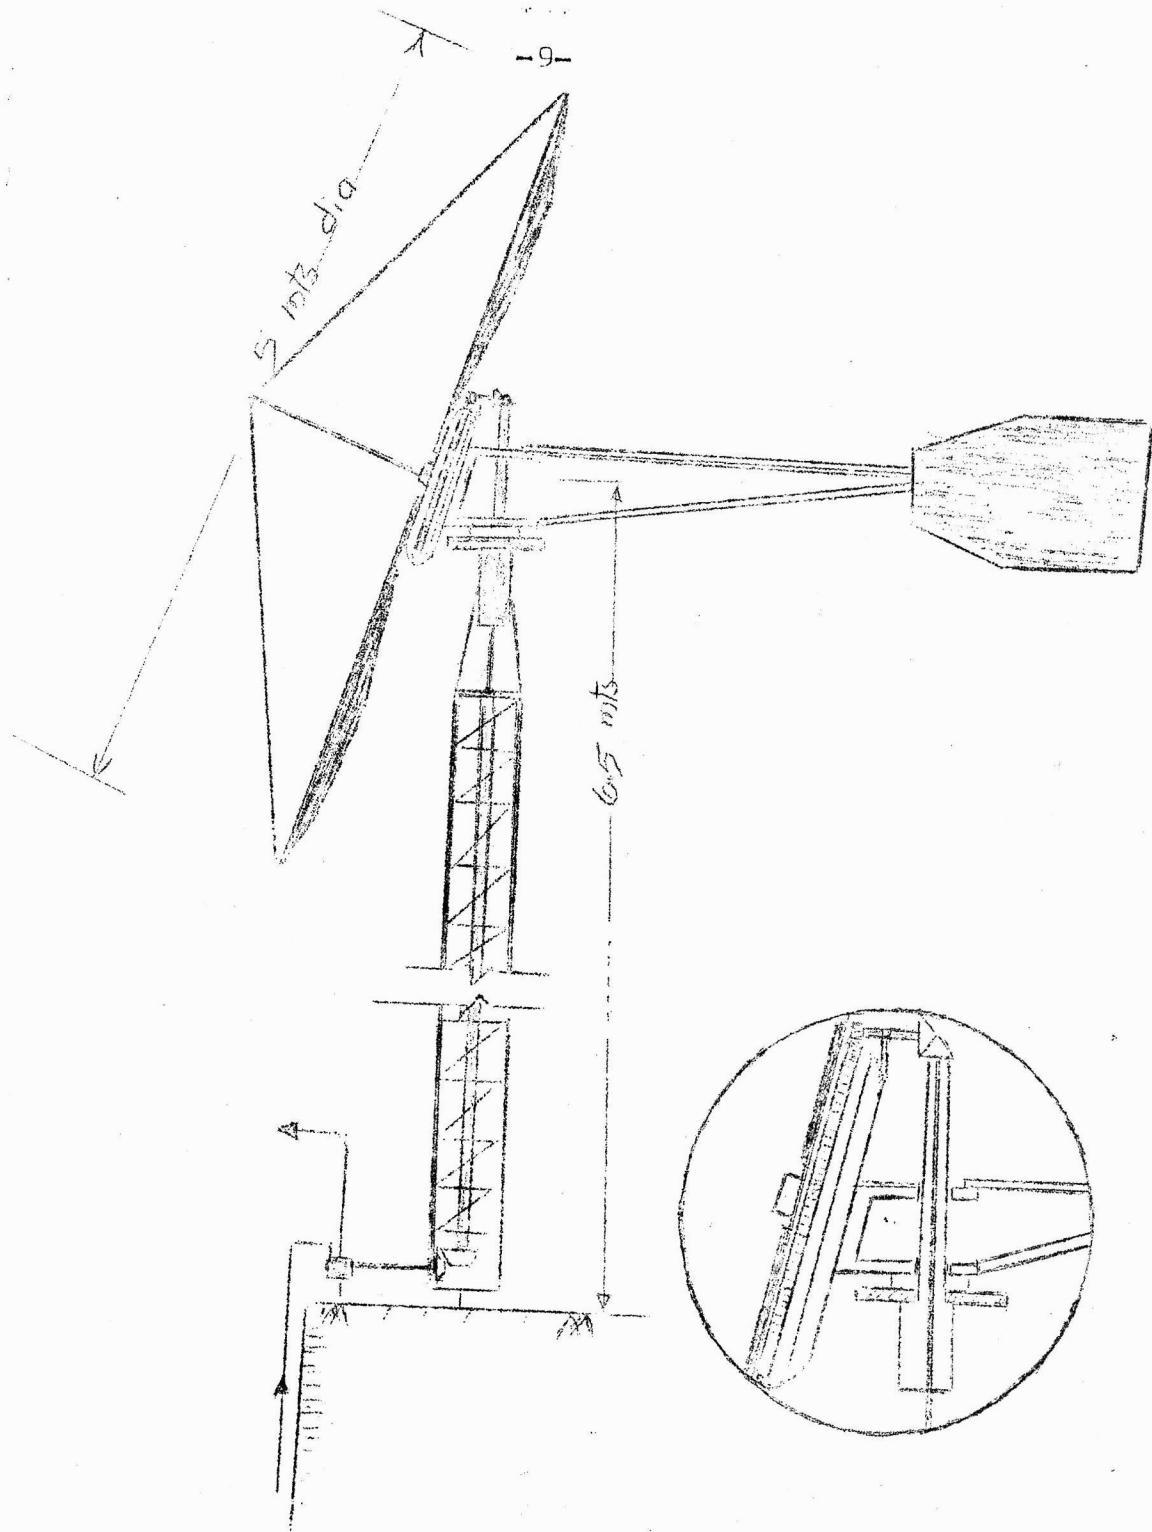

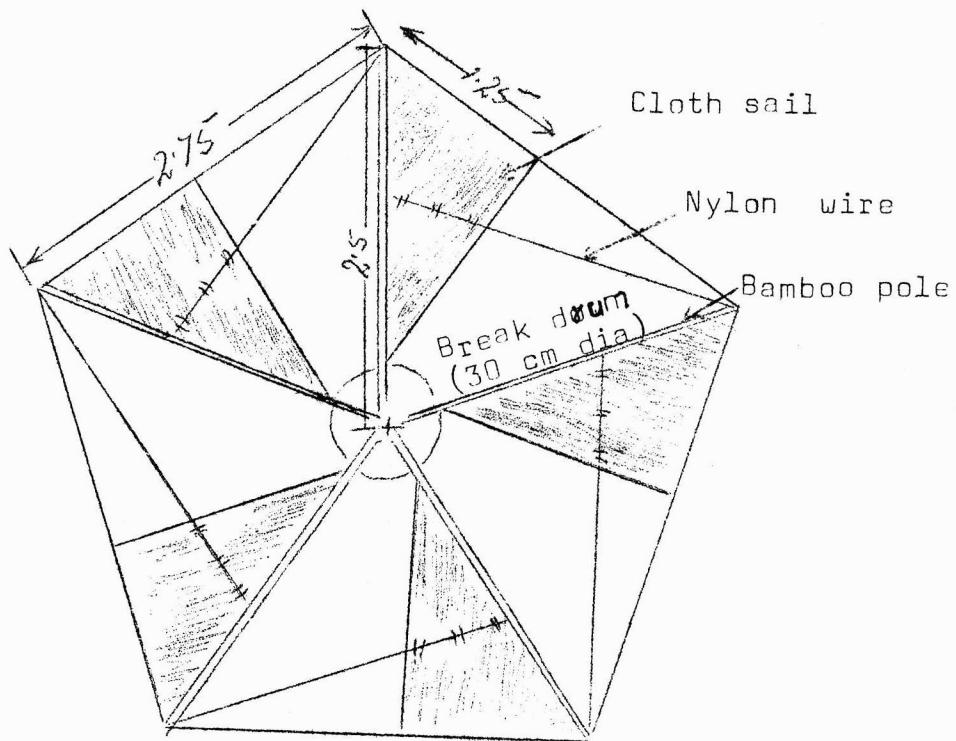

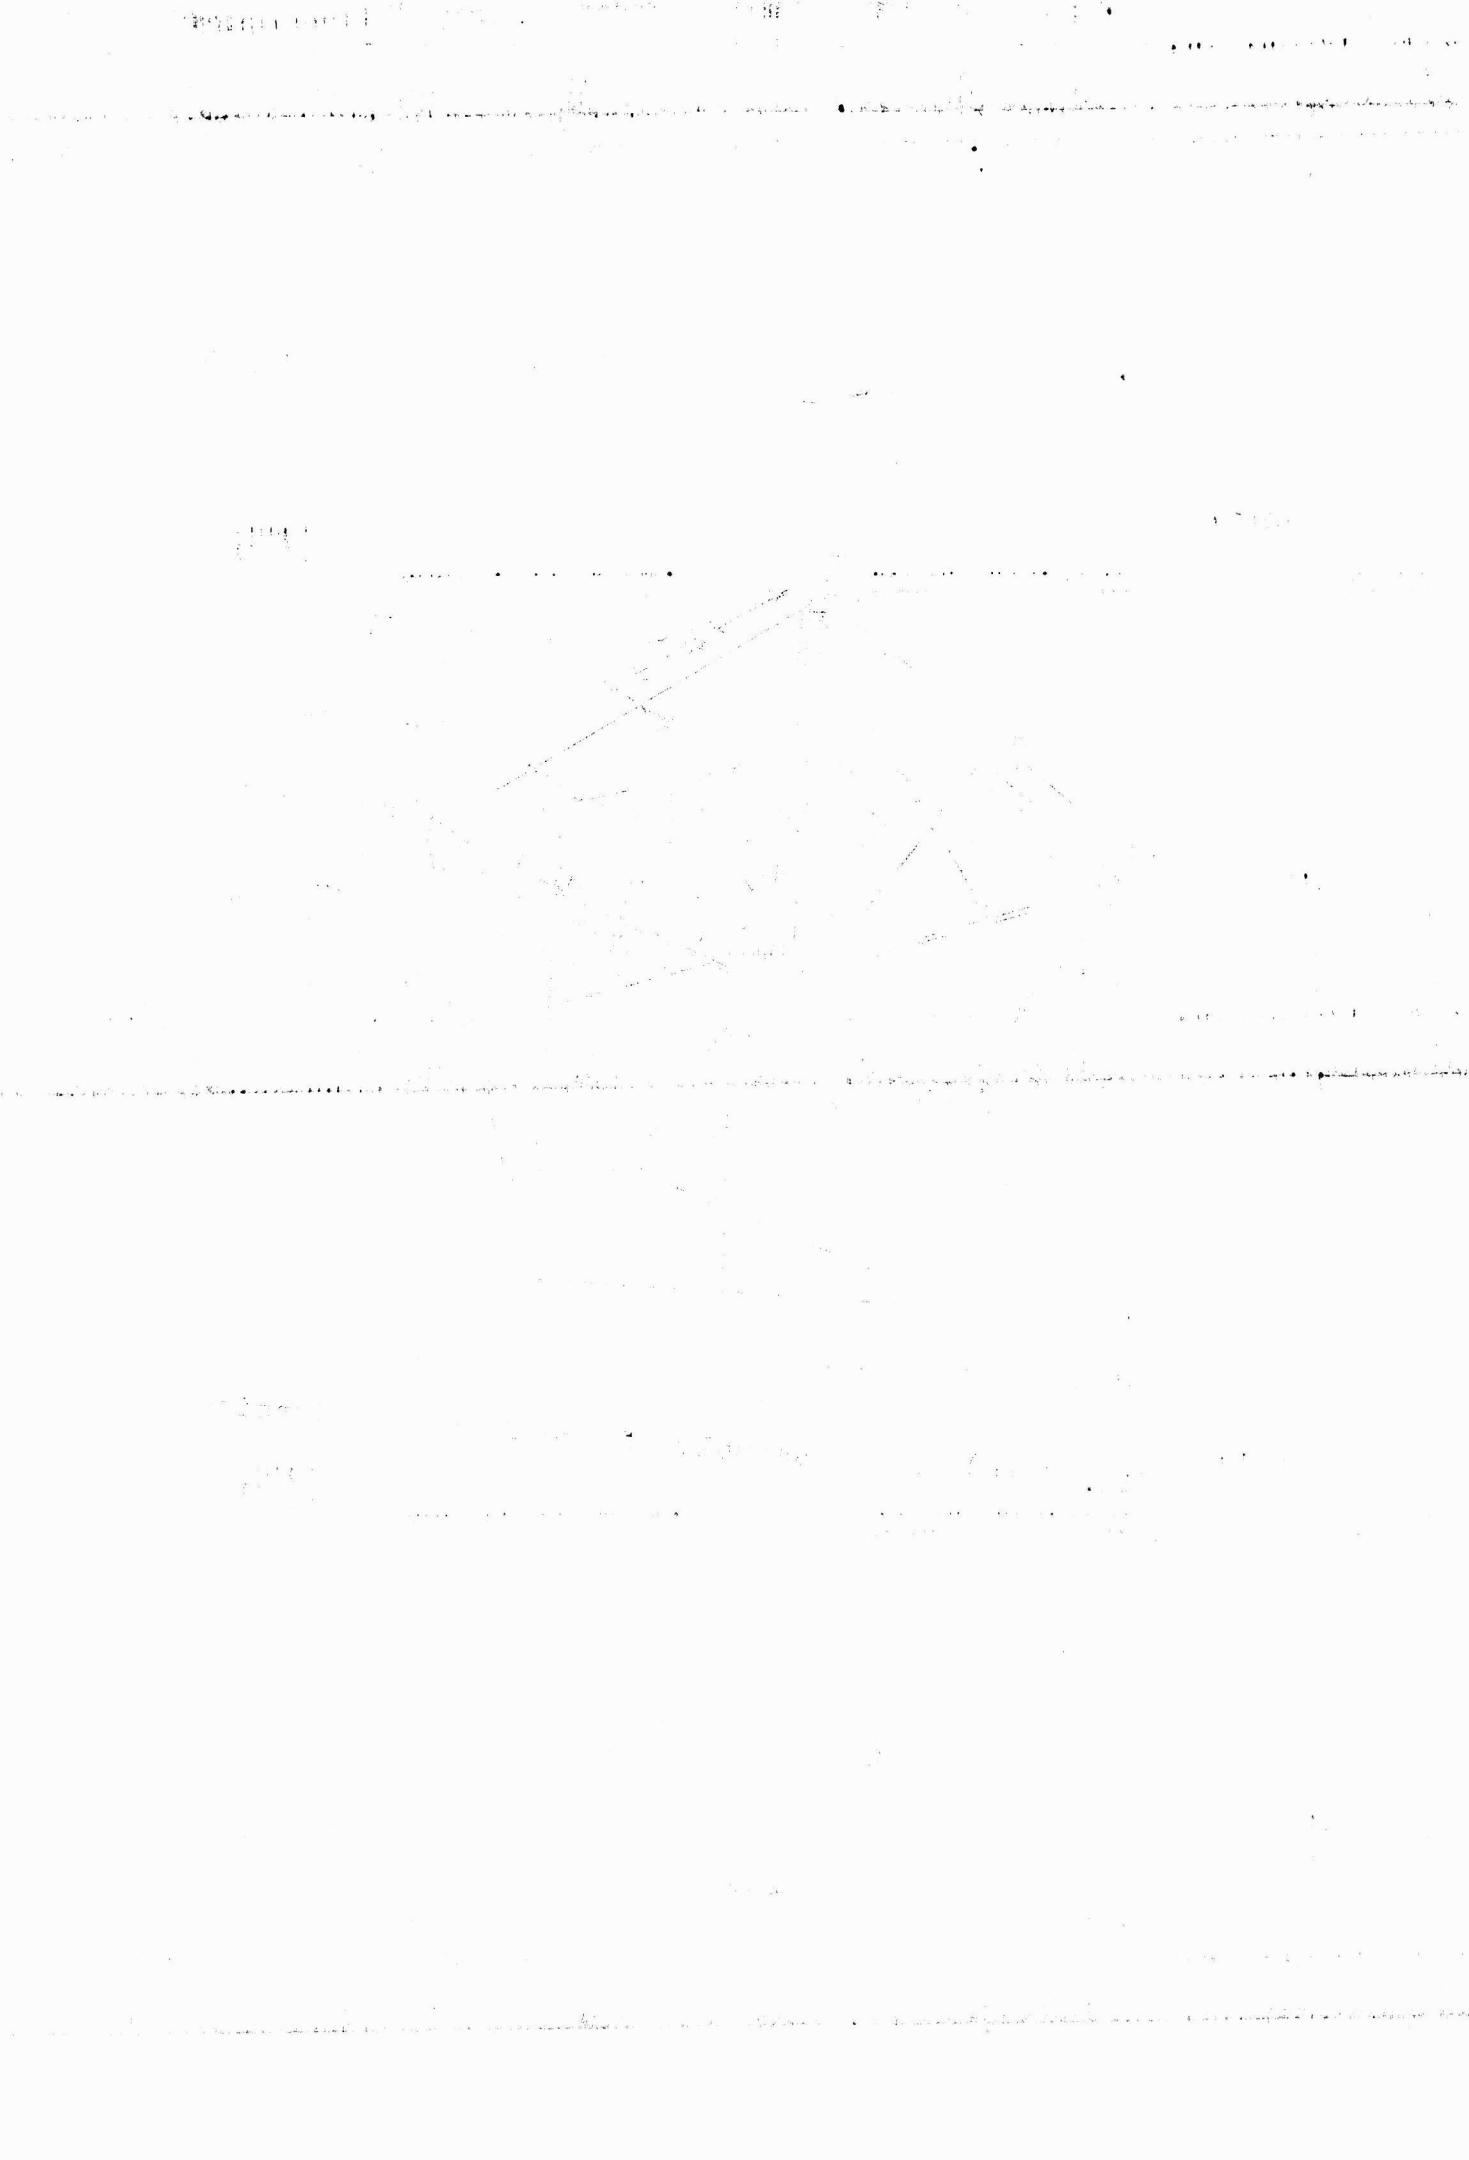

Fig.3(a) Low cost Wind Turbine

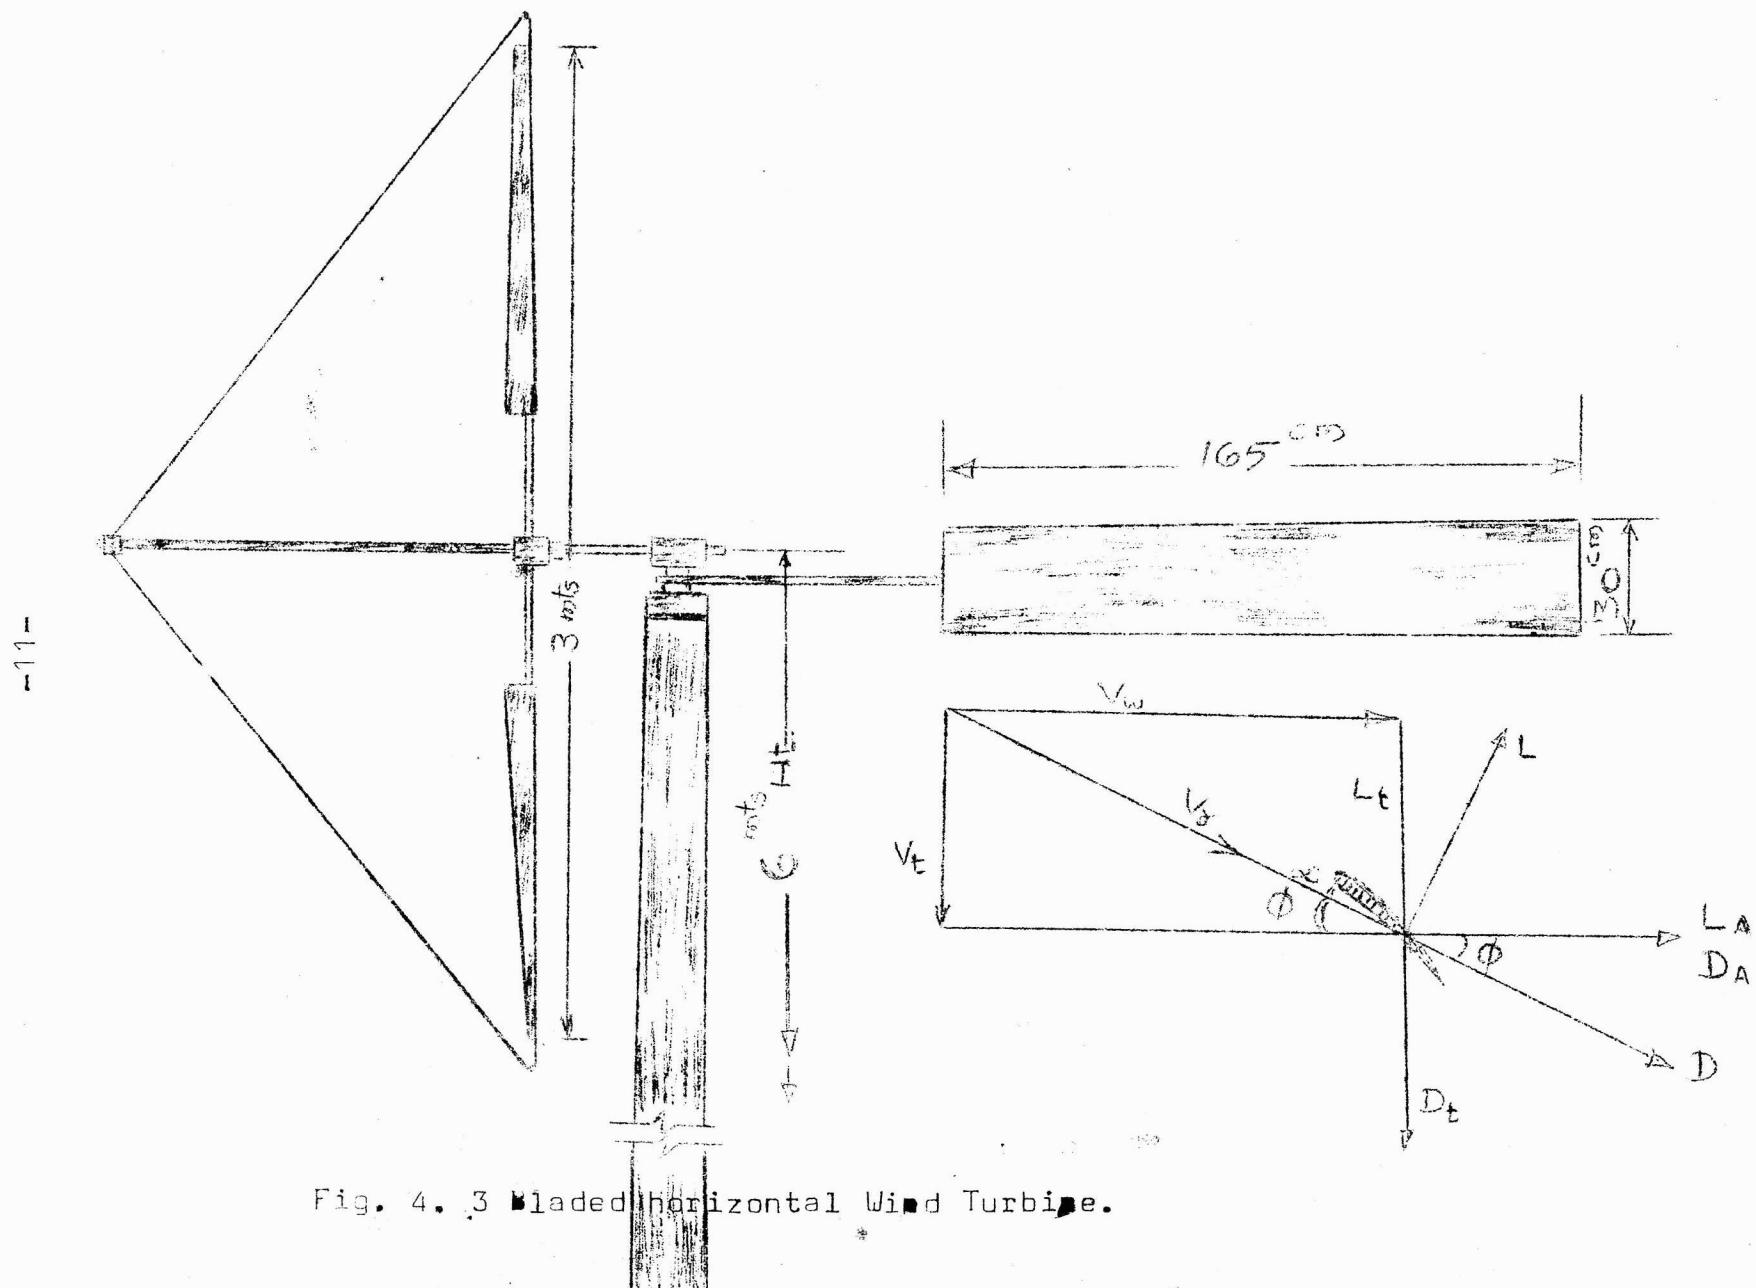

-10-

Rotor dia = 5 mts.

Fig. 3 (b) Rotor Assembly of Low Cost Wind Turbine

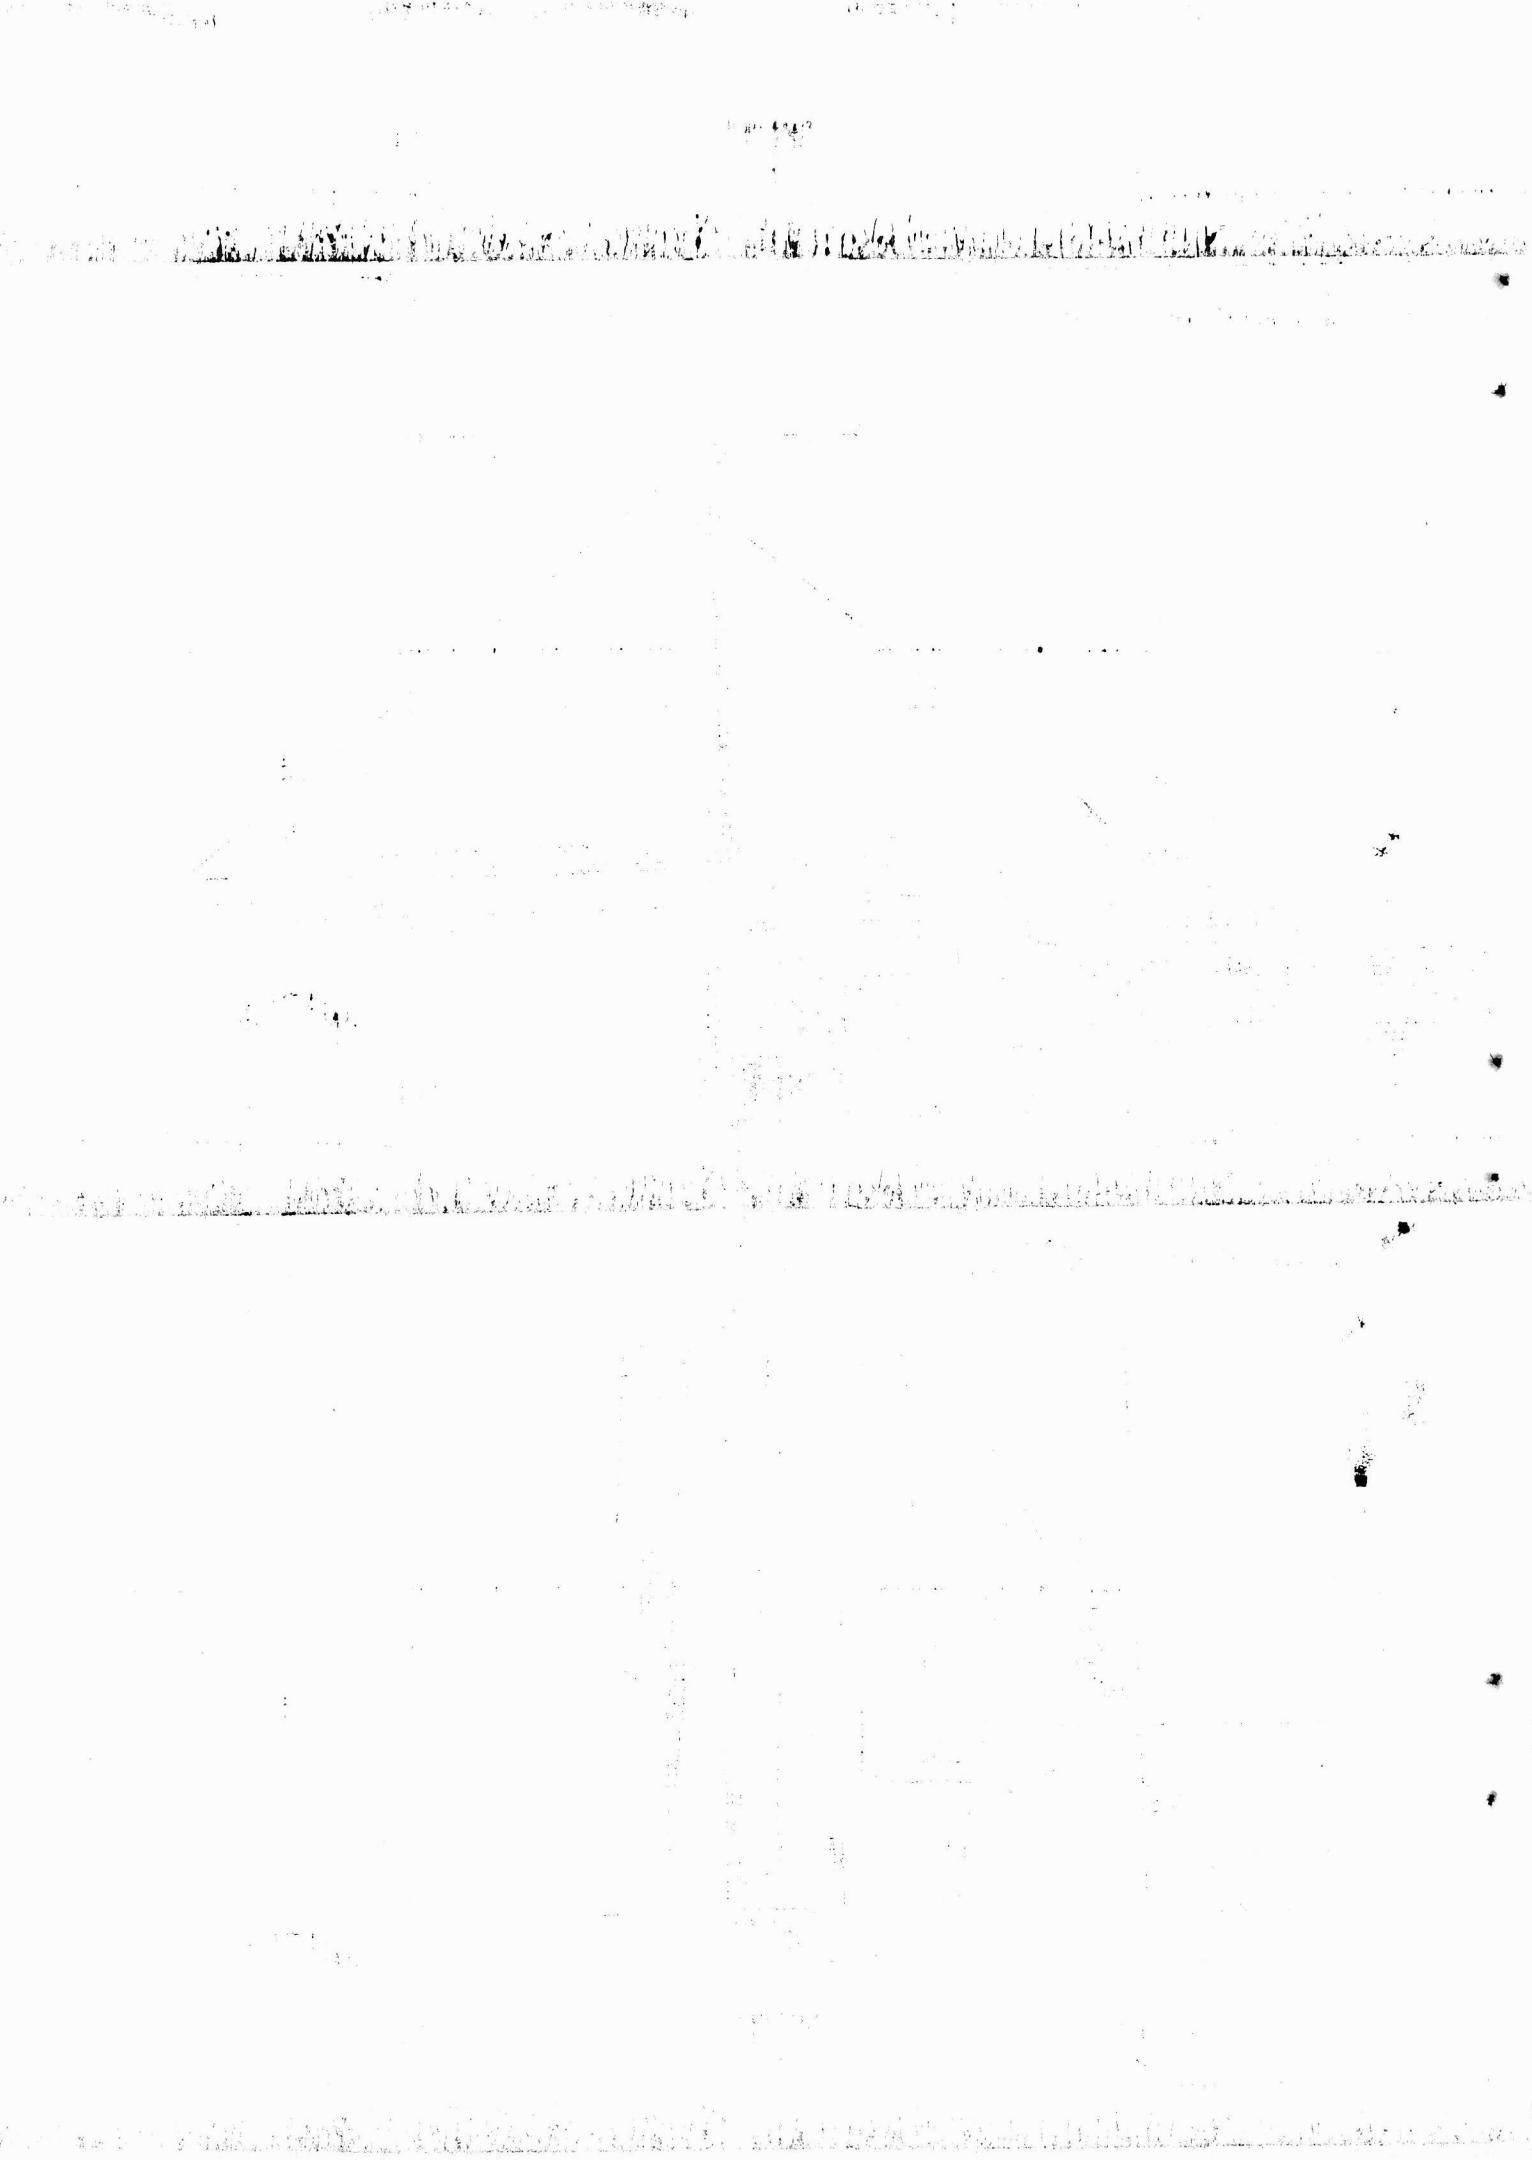

Table - 1. Design specifications of the
Low Cost KAU Wind Pump:

Type : Horizontal Axis, Sail Wing.
Rotor dia. : 5 M.
No. of blades : 5

Wind Speed:

Working speed : 18 Kmph.
Cut in speed : 5 Kmph.
Furling speed : 40 Kmph
Rated Power output: 0.5 hp
Tower height : 6.5 M

Pump : Single Stage, Self priming Centripetal,
25 x 25 mm size.

Performance details of pump:

	1/2 HP						
Met	6	8	10	14	18	24	28
LPM	60	57	55	50	46	38	34

3/4 HP

Materials of Construction:

Rotor : Iron, bamboo and ~~Canvas~~ Sails. welded

Tower : Angle iron, M.S. rods welded lattice guyed.

Pump : Cast iron with G.M impeller.

Cost Estimate:

Rotor -- Rs. 1,500-00

Supporting structure -- Rs. 2,000-00

Pump with fittings -- Rs. 1,000-00

Total -- Rs. 4,500-00

Table - 2 : Design values of various parameters for the 3 bladed Rotor ($\lambda = 6$) See Fig. 4

2.5 Comparison of the existing wind pumps:

Under the National Windmill Demonstration Project the Murugappa Chettiar Polytechnic, Madras has offered two wind pumps for installation at the College Campus, Tavanur and University headquarters, Vellanikkara. One unit is already received and the other is expected shortly. The brick foundation for both these pumps are over.

2.6 Future Programme of Work:

1. The fabrication of the low cost sail type wind pump will be completed and tested.
2. A prototype savonius rotor with deflector augmentor will be made and tested.
3. The performance for electric power generator of the 3 bladed rotor will be studied on receiving the low speed wing generator from PAU Centre.
4. Studies on pre-fabricated RCC poles as supporting structure will be conducted.

2.7 Procurement of Instruments for wind velocity studies:

Action has already been taken for the purchase of indicating and recording type anemometers and related instruments and it is in the final stage. The copies of last letters from the firms are given in appendix - III.

APPENDIX - II (a)

Proforma for collecting wind speed from interested farmers, farmers club members and others.

Dear Sir,

We are happy to learn that you are highly interested in the agricultural development of the State. You may be aware that we are blessed with many renewable energy sources which can be used for irrigation etc. in the crop production activities. These sources are often ignored thus not tapped; wind is one of these. Being in the sloping side of the Western Ghats many places in Kerala have good wind speed, but a clear data are not available. You may kindly help us to exploit the wind energy potential by returning the proformas enclosed in the sequence indicated.

Expecting your kind co-operation,

Yours faithfully,

Principal Investigator,
Wind Turbine Scheme.

To

Sri.

A/B/C

Proforma relating to wind data

1. Name :

2. Address :

3. Do you feel that your area experiences good wind : Yes / No.

4. If yes, please fill the following:

Visible Wind Effects

Period in months
of the year

From

i. Calm. Smoke rises vertically. From . . . To . . .

ii. Direction of wind shown by smoke drift, but not by wind vane. From . . . To . . .

iii. Wind felt on face, leaves rustle, ordinary vane moved by wind. From . . . To . . .

iv. Leaves and twigs in constant motion, wind extends light flag. From . . . To . . .

v. Raises dust, loose paper, small branches are moved. From . . . To . . .

vi. Small trees with leaves begin to sway, crested velvets from/on inland waters From . . . To . . .

xxxxxxxxxxxxxxxxxxxxxx

beginning to sway & created noise

vii. Large branches in motion; whistling heard in telegraph wires, umbrellas used with difficulty. From . . . To . . .

viii. Whole trees in motion; in convenience felt in walking against wind. From . . . To . . .

5. Are you interested to instal a wind pump : Yes / No.

6. If yes, at what cost : Rs.

7. Details of wind pump you need:

a) Source of water : Tube well/open well/river.

b) Depth of water : Meters.

c) Height to be pumped : meters.

d) Distance from source to point of delivery :

e) Approx. quantity of water required: lit/day.

f) Others if any :

8. Your comments if any:

Date : 3

Signature

Note: Please despatch Form A immediately, form B after one year and form C after 3 years.

APPENDIX - II (b)

Quantitative Description of Wind Speed:

Windspeed			Visible Wind Effects
(mph)	(kmph)	m/s	
0-1	0.62	0-.44	Calms: smoke rises vertically.
2-3	.62-5	.44-1.3	Direction of wind shown by smoke drift but not by wind vanes.
4-7	6-11	1.6-3.1	Wind felt on face; leaves rustle; ordinary vane moved by wind.
8-12	12-19	3.9-5.4	Leaves and twigs in constant motion; wind extends light flag.
13-18	20-28	5.7-8.0	Raises dust, loose paper, small branches are moved.
19-24	29-38	8.4-10.6	Small trees in leaf begin to sway, crested wavelets from on inland waters.
25-31	39-49	12.2-13.6	Large branches in motion; whistling heard in telegraph wires, umbrellas used with difficulty.
32-38	50-61	15.3-16.7	Whole trees in motion; inconvenience felt in walking against wind.
39-46	62-73	18.4-20.7	Wind drifts out but not by wind vanes.
47-54	74-85	21.5-23.8	Wind drifts in leaf, leaves rustle; ordinary vane moved by wind.
55-62	86-97	24.6-26.9	Leaves and twigs in constant motion; light flag bent.
63-70	98-109	27.7-30.0	Raises dust, loose paper, small branches are moved.
71-78	110-121	30.7-33.0	Small trees in leaf begin to sway, crested wavelets from on inland waters.
79-86	122-133	33.8-36.1	Large branches in motion; whistling heard in telegraph wires, umbrellas

ELECTRONIC INSTRUMENTS COMPANY

Stockist & Suppliers of:

Scientific, Electrical, Electronic & Industrial
Instruments

44, Cawasji Patel Street, FORT, BOMBAY-400 001.

Date: 11.12.87.

The Administrative Officer,
Kerala Agricultural University,
Kelappaji College of Agri.
Engineering & Technology,
TAVANUR.

Dear Sir,

Sub: Supply of Anemometer and Tachometer.

We acknowledge with thanks receipt of your order dated 5.12.87 for one number of Anemometer and Digital Tachometer.

We request you to please let us know the name and address of your bankers through whom we may forward despatch documents.

Please also let us know if we can send agreement for of Maharashtra State Government Stamp Paper.

Thanking you,

Yours faithfully,
For Electronic Instruments Company.

Sd/-Sd/-
Manager.

Dear Sir,

Ref: Yr.order No:C1-6403/84 dt.5.12.87 - LM-14-208
Wind Equipment.

...

Further to our letter of 10.12.87 we are pleased to inform you that the above equipment had been despatched from our factory and is under clearance at Madras. We shall arrange to despatch the same to you in about a weeks' time.

We also confirm that we shall prepare the Agreement and send you the Security Deposit with the Goods Receipt. This is for your kind information.

Thanking you and at your service, we remain,

Yours faithfully,
For LAWRENCE & MAYO (I) PVT.LTD.,
